4. Fruits

Prices and Supply/Demand Situation

In July, wholesale prices for most major fruit types increased. Prices for all banana varieties rose by 15%–37%, driven by decreased supply from major producing areas. Prices for all sizes of pineapple increased, ranging from 11% to 21%. Furthermore, all mango varieties experienced price increases, with *Karthakolomban* showing the highest rise (102%), followed by *Betti* (57%) and *Vilad* (52%), due to the end of the main harvesting period. Considering other fruits, the highest price increase was recorded for *slime apple* (102%), followed by *passion fruit* (46%), attributed to low stock availability. Conversely, prices decreased for *Wood apple* (-56%), *Passion fruit* (-27%), *Imported grapes* (-24%). These declines were due to the ongoing harvesting period for wood apple and passion fruit, as well as sufficient imported stocks of grapes.

Compared to the same period last year, wholesale prices for most fruit varieties have increased. The highest price increase was recorded for *slime apple* at 69% (Table 4.1).
