

Table of Contents

Chapter 1

Introduction

- 1.1 Background
- 1.2 Major Causes Leading to Water Scarcity
 - 1.2.1 Population Growth
 - 1.2.2 Urbanization
 - 1.2.3 Climate Change and Pollution of Water Resources
 - 1.2.4 Economic Development and Change of Lifestyle
- 1.3 Statement of the Research Problem
- 1.4 Objectives of the Study

Chapter 2

Methodology and Data

- 2.1 Selection of Study Sites
- 2.2 Description of Study Sites
 - 2.2.1 Anuradhapura Group Town Water Supply Scheme
 - 2.2.2 Walawe River Basin
 - 2.2.3 Kirindi Oya Basin
- 2.3 Sampling Design
 - 2.3.1 Data Collection Methods

Chapter 3

Water Allocation Policies and Disputes in Selected Countries

- 3.1 Water Allocation in India
 - 3.1.1 Cauvery Water Dispute
 - 3.1.2 Krishna-Godavari water dispute
 - 3.1.3 Ravi Beas Dispute
- 3.2 Water Rights in Chile
- 3.3 Australia: Murray Darling Basin Experience
- 3.4 USA: Tennessee Valley Authority
- 3.5 Legal Doctrines Relating to Water Allocation

Chapter 4

Allocation of Water between Agriculture and Domestic Use

- 4.1 Socio – Economic Features of the Study Area
 - 4.1.1 Demographic Features
 - 4.1.2 Economic Features
- 4.2 Competition for Water in the Area and the Process Adopted for Water Allocation
 - 4.2.1 Background of the Problem
 - 4.2.2 Conflict between Farmers and the Water Supply Project
 - 4.2.3 Transform of Approach of NWSDB in Project Implementation
- 4.3 Impacts of the Current Water Sharing Arrangement on the Farmers and the Drinking Water Users
 - 4.3.1 Impacts on Domestic Water-Users of Anuradhapura
 - 4.3.2 Impacts on Farming Community in Thuruwila
- 4.4 Water Allocation Priorities among Farmers and the Drinking Water Users

Chapter 5

Allocation of Water between Agriculture and Hydropower Generation

- 5.1 Socio-economic Features of the Study Area
 - 5.1.1 Demographic Features
 - 5.1.2 Economic Features
- 5.2 Process Adopted in Water Allocation
 - 5.2.1 Background of the KIS
 - 5.2.2 Water Sharing between Farmers and Ceylon Electricity Board
 - 5.2.3 Gross Water Productivity in Paddy Cultivation and Hydropower Generation
 - 5.2.4 Method of Water Allocation
- 5.3 Social and Economic Consequence of the Water Allocation Mechanism Adopted
 - 5.3.1 Impacts of Water Sharing on Agricultural Activities
 - 5.3.2 Drawbacks of the Compensation Programme Adopted
 - 5.3.3 Impact of Compensation Mechanism on Household Economy
 - 5.3.4 Other Impacts of the Compensation Programme
 - 5.3.5 Willingness of Farmers to Accept a Compensation for Irrigation Water in *Yala* Seasons
- 5.4 Water Allocation Priorities among the KIS Farmers

Chapter 6

Allocation of Water between Agriculture and Livestock

- 6.1 Socio-Economic Features of the Study Area
 - 6.1.1 Demographic Features
 - 6.1.2 Economic Features
- 6.2 Water Sharing Arrangements under Kirindi Oya Basin
 - 6.2.1 Water Allocation between Old System and New System
 - 6.2.2 Allocation of Water and Land for Livestock Farming
 - 6.2.3 Menik Ganga Diversion and Availability of Water for KOISP
- 6.3 Impacts of KOISP on Livestock Enterprise in the Area
- 6.4 Water Allocation Priorities in the Area

Chapter 7

Conclusion and Recommendations

- 7.1 Major Findings
 - 7.1.1 Findings from Water Policies of Selected Countries
 - 7.1.2 Findings from Thuruwila and Anuradhapura
 - 7.1.3 Findings from Kalthota Irrigation Scheme (KIS)
 - 7.1.4 Findings from KOISP (Livestock farmers)
- 7.2 Policy Implications
- 7.3 Recommendations
